PROFILE

Application Security professional with 2+ years of experience in Web Application Penetration Testing, Network VAPT, Mobile Application Penetration Testing (Android/iOS) and Secure Code Review (manual and automated). Skilled in manual testing using Burp Suite, Fortify WebInspect and related tools, with a strong understanding of OWASP standards and common security vulnerabilities. Experienced preparing detailed VAPT findings reports and walking clients and stakeholders through results, remediation guidance, and retesting outcomes. Comfortable handling stakeholder queries and escalations through to closure. Certified Ethical Hacker (CEH) v13.

SKILLS

Core Security Skills
Web Application Penetration Testing, Network VAPT, Mobile Application Penetration Testing, API Security Testing, Secure Code Review (Manual & Automated), Vulnerability Assessment, Secure SDLC, Business Logic Testing, Client Reporting & Escalation Handling

Web & API Security
OWASP Top 10, OWASP API Security Top 10, REST API, GraphQL, BOLA/IDOR, BFLA, SQL Injection, XSS, CSRF, Authentication and Authorization Testing, JWT, OAuth 2.0, Session Management

Security Testing
SAST, DAST, SCA, CVSS, False Positive Analysis, VAPT Report Writing & Presentation, Manual and Automated Security Testing

Mobile & Cloud
Android Security Testing, iOS Security Testing, Mobile VAPT, MobSF, Cloud Security Fundamentals, AWS Security Fundamentals

Automation & Programming
Python, SQL, JavaScript, C/C++, PowerShell, Shell Scripting, Pytest, Selenium WebDriver, Jenkins CI/CD

Security Tools
Burp Suite, Metasploit, Nmap, Nessus, Wireshark, SQLmap, Postman, OWASP ZAP, Fortify WebInspect, HCL AppScan, OpenVAS, Nikto, MobSF, SonarQube, Kali Linux

Frameworks
OWASP, CWE Top 25, CVSS, Secure SDLC

PROJECTS

Cloud Security Project

- Implemented encryption mechanisms to protect sensitive data before cloud storage.
- Designed secure data-transmission mechanisms using cryptographic techniques.
- Applied secure communication protocols to protect data in transit between users and cloud services.

EDUCATION

B.Tech – Information Technology
JJ College of Engineering and Technology
2017 – 2021 | CGPA: 7.54

PROFESSIONAL EXPERIENCE

Junior Test Engineer, Ventuno Technologies
08/2025 – Present | Chennai

- Conducted security assessments across 20+ web applications and REST APIs, identifying BOLA, BFLA, business logic, SQL Injection, authentication and authorization vulnerabilities.
- Performed manual vulnerability assessment and validation using Burp Suite and Nessus, including API request manipulation using Burp Suite and Postman.
- Tested JWT and OAuth 2.0 authentication and authorization controls, along with input/data validation checks, for misconfigurations, access-control weaknesses and privilege escalation risks.
- Integrated Pytest-based API automation with Jenkins CI/CD pipelines to support continuous, DevSecOps-aligned security validation.
- Supported secure code review and threat modeling activities within the SDLC, collaborating with development teams on vulnerability remediation and security retesting.
- Analyzed vulnerabilities using CVSS severity and business impact, preparing clear technical reports and remediation guidance for stakeholders.

Security Tester (Apprentice), Standardisation Testing and Quality Certification (STQC)
05/2024 – 05/2025 | Chennai

- Performed Web Application Security Testing and VAPT, identifying SQL Injection, XSS, CSRF, authentication bypass and broken access control vulnerabilities.
- Conducted secure code review (manual and automated) using Fortify WebInspect, HCL AppScan and OWASP ZAP.
- Performed vulnerability validation and false-positive analysis for security findings.
- Tested authentication, authorization and session-management controls in web applications.
- Conducted Network VAPT and penetration testing of network infrastructure using Nmap, Nessus and Kali Linux.
- Prepared detailed VAPT findings reports with vulnerability evidence, risk ratings and remediation recommendations for stakeholders.

CERTIFICATIONS

Certified Ethical Hacker (CEH) v13 – EC-Council

AWS Security Fundamentals – Amazon

Python Certification – HackerRank

Hands-on Training:

- PortSwigger Web Security Academy
- OWASP Web Security Testing
